

About GLOW

GLOW is a global leadership platform for women in leadership across board. GLOW aims to provide women in leadership a platform to learn, grow, and glow in every area of their lives. Women in leadership are often faced with numerous challenges to balance work and life, and often find themselves in compromising and conflicting situations in their quest to pursue their careers and yet embrace the demands of life. It does not have to be either, or, it can be both!

GLOW provides women the opportunity to develop their skills to increase their level of effectiveness both in the workplace and everyday life. Given the high rates of divorce, high rates of dysfunctional families, high burn-out rates, high stress rates among women in leadership, it is clear that most women particularly in senior and executive management are struggling to keep up with the demands at work and life.

GLOW targets senior executive and management women in leadership. GLOW will seek key corporate companies, parastatals, and government ministries for endorsement and partnership to maximize credibility. Given that GLOW is international, the emphasis would be to prioritize multinational companies.

Program Goal

Increase the percentage of women in leadership that excel in all spheres of life leading well-balanced, all-rounded lives.

Program Objectives

1. Empower women in leadership with leadership skills to excel in their careers and family lives.
2. Provide a platform for women to share and learn from others at the same level of leadership and career progression.
3. Provide a platform for leadership advancement through learning, sharing, and supporting respective country-based leadership programs.

4. Raise the next generation of women in leadership.

Program Interventions

1. Leadership seminars, master classes, chat rooms, webinars, conferences
2. One-year executive leadership program for senior executives
3. One-year executive leadership program for managers
4. Skills transfer program for upcoming leaders
5. Mentorship and coaching program
